## Luxury Homes

*Create a truly spectacular atmosphere*

The domestication of fire has illuminated the home for centuries. Despite the often short lived trends in architecture and design, a fireplace in the home has remained constant.

Power venting capabilities up to 500-ft and multiple air intake location options provide you with the ultimate flexibility. Montigo's sleek minimalist design of unobstructed lines and ingeniously concealed technology means that when your fireplace is not in use it will fade into your living space and let life take over.
